1 GENERAL PRESENTATION AND DESCRIPTION

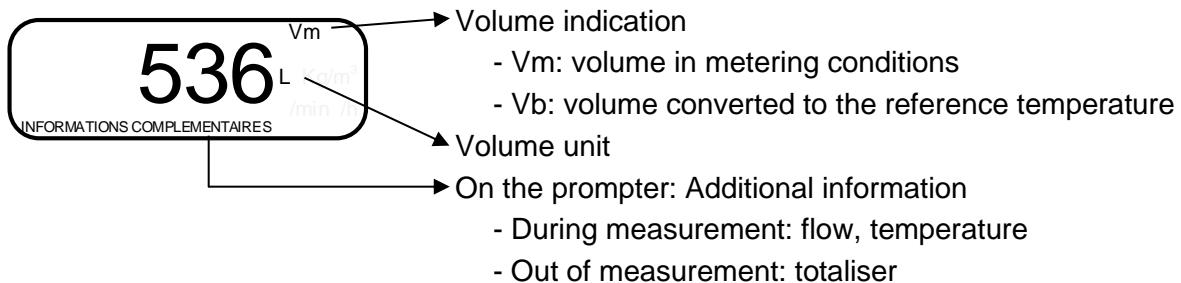

The LPG TRONIQUE is a measuring system that must be fitted on road tankers. It measures liquefied gases under pressure.

The LPG TRONIQUE contains these parts:

- ⇒ A turbine measuring device for liquefied petroleum gas
- ⇒ A MICROCOMPT+ electronic device
- ⇒ A gas separator
- ⇒ A pump
- ⇒ An automatic pressure control valve
- ⇒ A set of devices by two ways of delivery, controlled by a valve allowing the choice between a full flexible hose delivery or by a direct release
- ⇒ A temperature probe (option)
- ⇒ A printer

There are two models of LPG TRONIQUE: volume at temperature or volume at reference temperature (measure and compensation of the volume at a reference temperature). The LPG TRONIQUE can operate with the embedded computing option. A remote control version of the LPG TRONIQUE is also available (LPG TRONIQUE CD). This document presents all the possibilities. Some menus are the same; others are specific and are differently identified.

The LPG TRONIQUE has one display:

 ALMA <small>ALMA GROUP</small>	MU 7051 EN F LPG TRONIQUE	Page 3/18
	This document is available on www.alma-group.com	

The LPG TRONIQUE has three pushbuttons:

	Increment a blinking figure or letter Come back to the previous step Stop the measurement
	Select a figure, a letter or a menu
	Validate the data

Use the RFID keys:

	Blue key: Level-User This key is associated to a single MICROCOMPT+. It is used to switch into SUPERVISOR mode.
	Green key: Level-Manager This key is associated to a single or several MICROCOMPT+. It is used to switch into SUPERVISOR mode.

2 CONNECTED FEATURES

The wireless connection enables the MICROCOMPT+ to communicate with an embedded computer or with a PC/tablet/portable device, in hazardous area (ATEX).

The connected functions of the MICROCOMPT+ are:

- ⇒ Incoming data flow processing
- ⇒ Management of the communication modules below
- ⇒ Updating of the app, tickets and language catalogues as far as the MICROCOMPT+ has been switched into METROLOGICAL mode.

Communication modules are listed below:

- ⇒ Wi-Fi (IEEE 802.11 b/g/n (2.4GHz) **OR** Bluetooth Low Energy 4.1
- ⇒ GSM (2G, 3G, 4G) / GPS
- ⇒ RFID NFC allowing the reading of an RFID key to switch in SUPERVISOR mode
- ⇒ Ethernet Base 10/100

The GSM module associated to the GPS navigation system allows the device tracking. Two antennas are located outside the MICROCOMPT box.

	MU 7051 EN F LPG TRONIQUE	Page 4/18
	This document is available on www.alma-group.com	

Three tricolor LED on the MICROCOMPT+ front face are showing the wireless connection status as described in the table below:

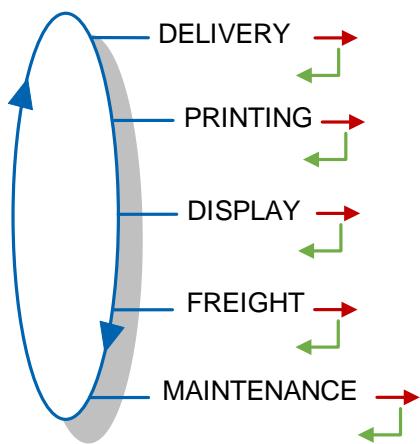

Left-hand LED: Bluetooth (Blue) or Wi-Fi (Cyan)	Middle LED: GSM / GPS	Right-hand LED: NFC (RFID)
<p><u>Steady light:</u></p> <ul style="list-style-type: none"> • Blue / Cyan*: Connection OK • Red: Waiting for initialization <p><u>Flashing light:</u></p> <ul style="list-style-type: none"> • Blue / Cyan slow flashing: Waiting for connection • Blue / Cyan rapid flashing: Communication in progress • Red: Initialization error 	<p><u>Steady light:</u></p> <ul style="list-style-type: none"> • Purple: Waiting for internet connection • White: Internet connection OK • Red: Waiting for initialization <p><u>Flashing light:</u></p> <ul style="list-style-type: none"> • White: Transfer in progress • Red every 2 seconds: Coordinates not found • Green every 2 seconds: GPS OK • Red: Initialization error 	<p><u>Flashing light:</u></p> <ul style="list-style-type: none"> • Green: Authentication of the RFID key OK • Red: Authentication error of the RFID key • Green/ Red: RFID key not accepted, but authentication is ok

3 OPERATING RECOMMENDATIONS

Safety valves may be incorporated in the LPG TRONIQUE. If they are located downstream of the turbine meter they must open to the atmosphere or be connected to the receiving tank.

	MU 7051 EN F LPG TRONIQUE	Page 5/18
	This document is available on www.alma-group.com	

4 USE THE LPG TRONIQUE: USER MODE

In USER mode, the LPG TRONIQUE displays a blinking figure which is the latest delivered quantity. On the prompter, you can see the name of the menu.

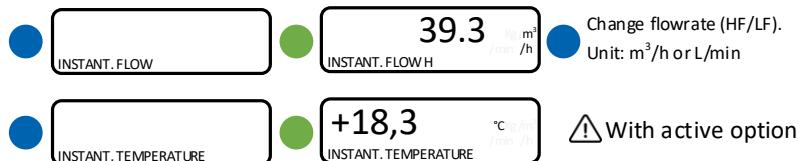

The use of the LPG TRONIQUE depends on the hardware configuration of the truck, the features and the configuration of the equipment carried out during commissioning.

Therefore, the user menu depends on several items:

- ⇒ The number of distribution ways (one or two)
- ⇒ The distribution mode (free or preset)
- ⇒ The temperature control (conversion of the volume).

During measurement, the following information may be displayed:

- ⇒ The instantaneous high or low flow rate. The unit is m³/h or L/min; depending on the display unit set
- ⇒ The temperature (°C) if it is considered.

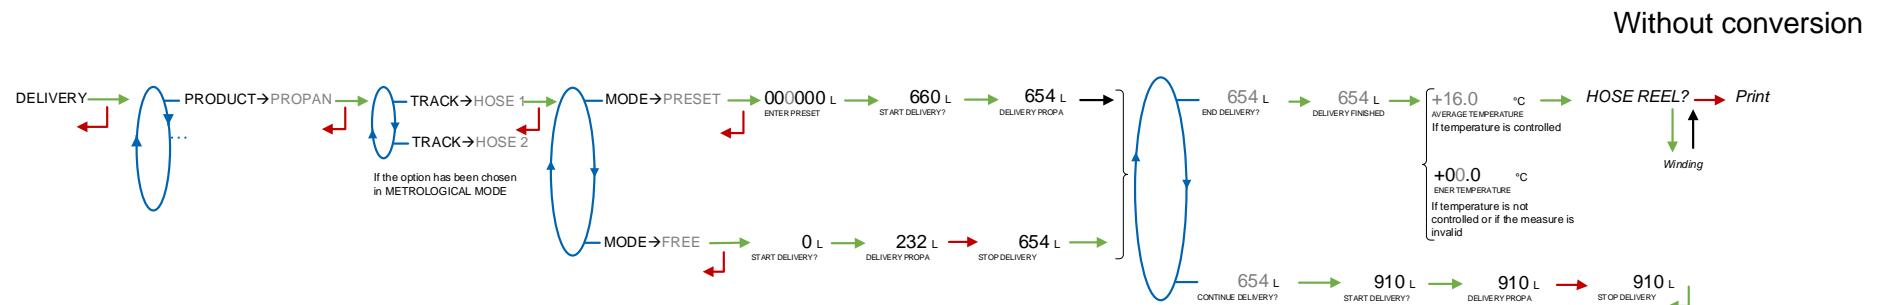

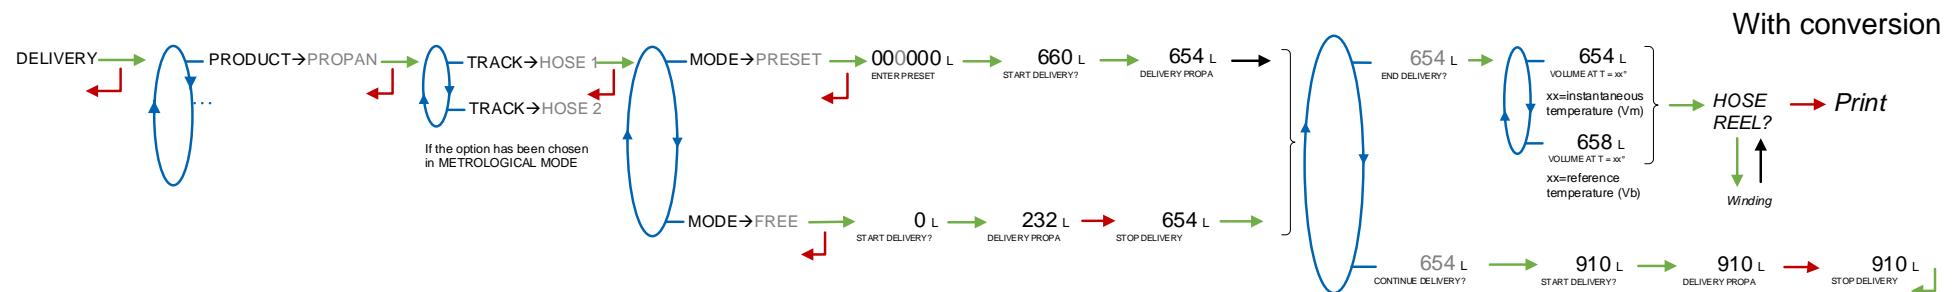

Back to normal display is automatic: DO NOT PRESS RED CLEAR BUTTON TO KEEP FROM INTERRUPTING THE MEASURING OPERATION.

 ALMA <small>ALMA GROUP</small>	MU 7051 EN F	Page 6/18
	LPG TRONIQUE	
This document is available on www.alma-group.com		

4.1 Menu DELIVERY

If the LPG TRONIQUE is configured with a LYNX or EPS-T5 remote control, the menus for choosing the product and entering the volume (MODE-> PRESET>SAISIR PREDE) are not shown.

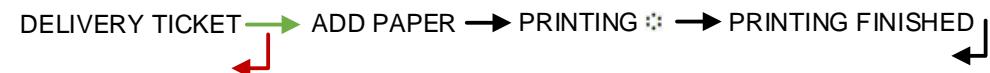

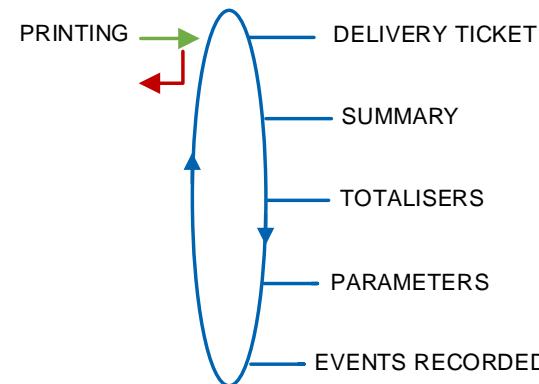

HOSE REEL :

The sub-menu is only available if the RCT5 remote control and hose control are active.

Printing:

If the menu PRINTER SETTINGS>DELIVERY TICKET→ON is set in SUPERVISOR MODE, the delivery ticket of the last measuring operation is printed:

**4.2 Menu PRINTING**

DELIVERY TICKET: Print the ticket of the last measuring operation

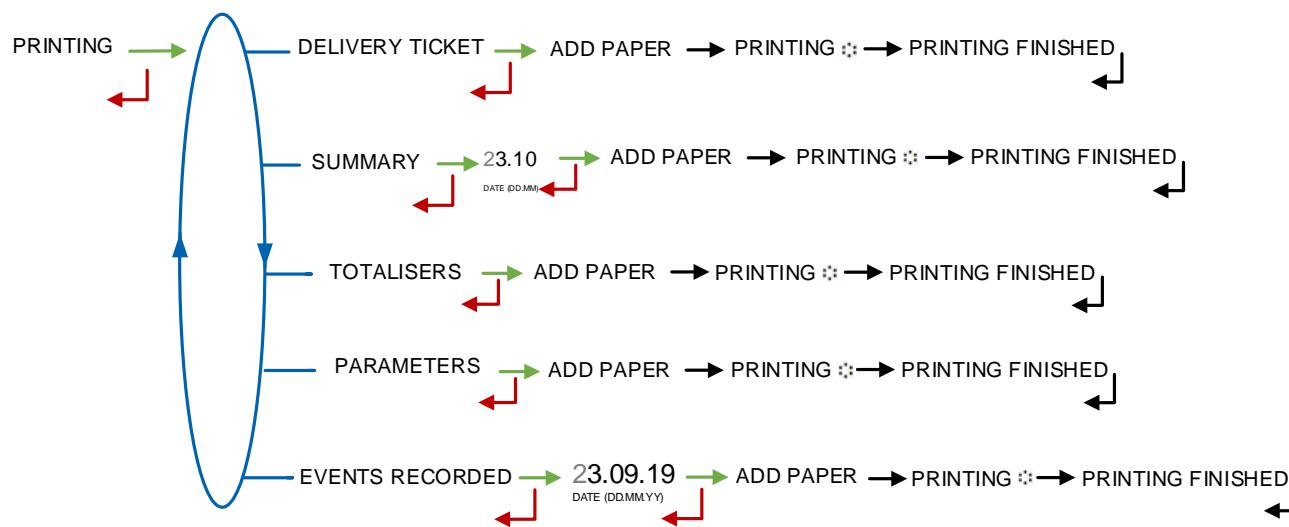

SUMMARY: Record a date and validate to print the summary of the measuring operations

TOTALISERS: Print the products totalisers.

PARAMETERS: Print the recorded parameters.

EVENTS RECORDED: Record a date and validate to print the events recorded.

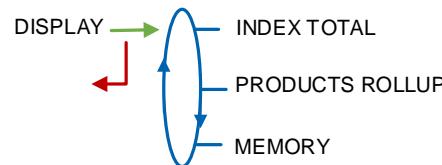

ALMA ALMA GROUP	MU 7051 EN F LPG TRONIQUE	Page 8/18
This document is available on www.alma-group.com		

ALMA ALMA GROUP	MU 7051 EN F LPG TRONIQUE	Page 9/18
This document is available on www.alma-group.com		

4.3 Menu DISPLAY

This menu is available in standby mode or when you stop temporarily the measurement. You can see the totaliser value and the measurement results.

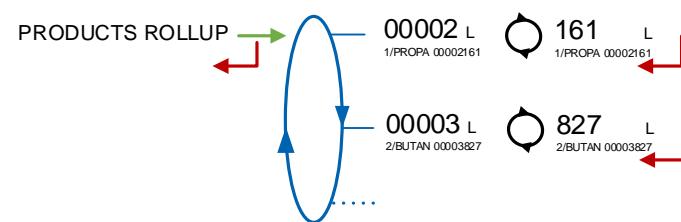

4.3.1 Sub-menu INDEX TOTAL

Displays the main totaliser.

4.3.2 Sub-menu PRODUCTS ROLLUP

Display the secondary totalisers per product.

4.3.3 Sub-menu MEMORY

You can read all the measurement results stored by the MICROCOMPT+. That can be done in two ways:

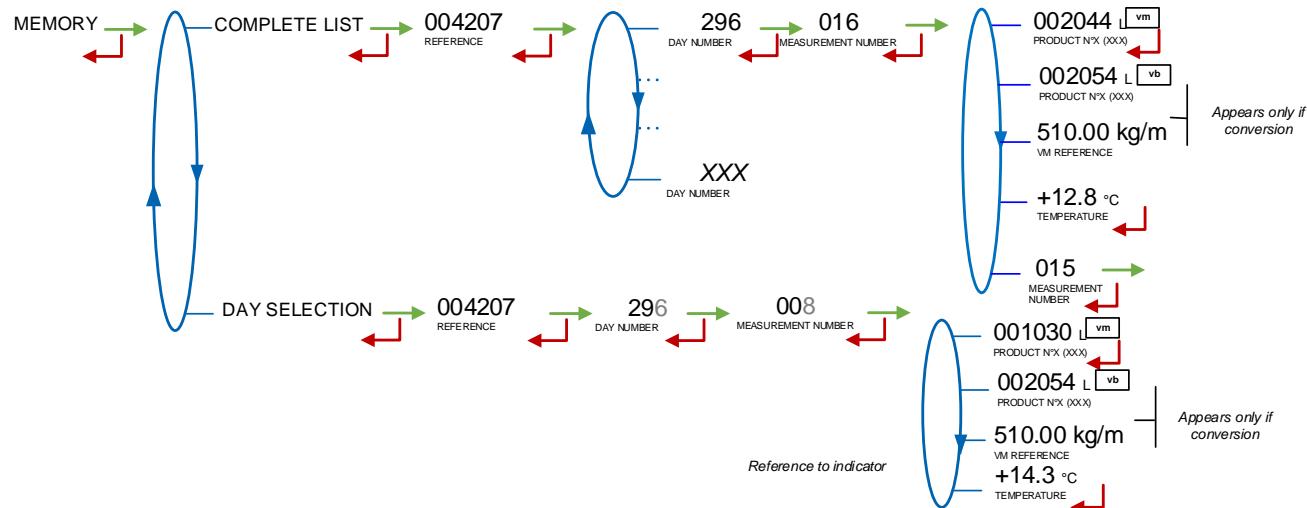

ALMA ALMA GROUP	MU 7051 EN F LPG TRONIQUE	Page 10/18
This document is available on www.alma-group.com		

COMPLETE LIST: Display all the measurement details recorded from the newest to the oldest, sorted by day then by measurement number.

DAY SELECTION: Display a specific measurement by selecting the day number and the measurement number.

For each measurement, you can read:

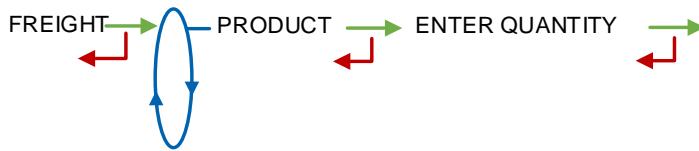

- The measured quantity, the number and the name of the product
- The temperature, with active option

4.4 Menu FREIGHT

This menu depends on the configuration of the LPG TRONIQUE. The product and the freight quantity are set by the user or automatically. In that case, they cannot be manually changed. The freight quantity is updated as the measuring operations progress.

 ALMA ALMA GROUP	MU 7051 EN F LPG TRONIQUE	Page 11/18
This document is available on www.alma-group.com		

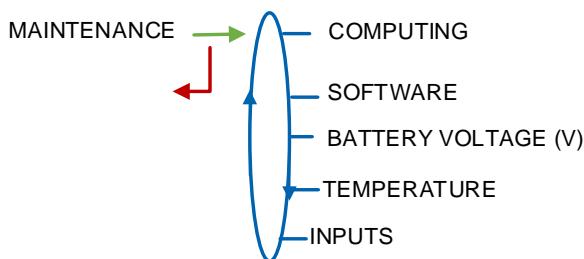

For the next operation, the LPG TRONIQUE displays the name of the product set for the freight.

The free delivery mode can start if the quantity set for the freight is non-zero. The preset delivery mode can start if the quantity set for the freight is non-zero and if the preset volume is below or equal to this quantity.

When the user enters the preset volume, the MICROCOMPT+ can display the information that follows:

- MINIMUM QUANTITY: The volume set is less than the minimum quantity
- MAXIMUM QUANTITY: The volume set is higher than the quantity set for the freight
- PRESET→NOT POSSIBLE: The freight quantity is null or less than the minimum quantity
- FREE→NOT POSSIBLE: The freight quantity is null.

4.5 Menu MAINTENANCE

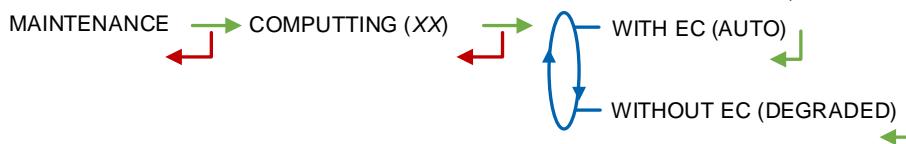

4.5.1 Sub-menu COMPUTING

This menu depends on the setting of the LPG TRONIQUE.

- If the LPG tronique manages IT : this menu is used to enable or disable operation with embedded computing.

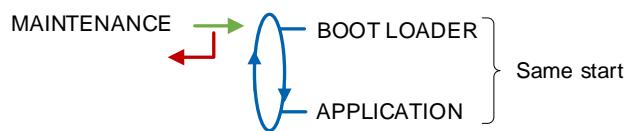

COMPUTING→WITH IC (auto): Enables operation with embedded computing

COMPUTING→WITHOUT IE (degraded) : Enables degraded operation without on-board IT (in the event of on-board IT failure, for example)

 ALMA <small>ALMA GROUP</small>	MU 7051 EN F	Page 12/18
	LPG TRONIQUE	
This document is available on www.alma-group.com		

4.5.2 Sub-menu SOFTWARE

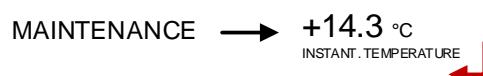

4.5.3 Sub-menu BATTERY VOLTAGE (V)

Displays the battery voltage in volts.

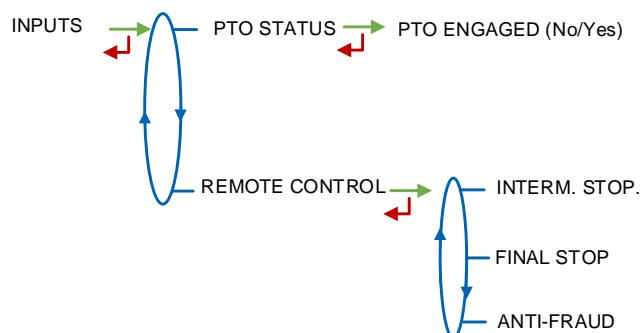

4.5.4 Sub-menu TEMPERATURE

This menu shows the current temperature.

4.5.5 Sub-menu INPUTS

Input status display for easy maintenance.

 ALMA <small>ALMA GROUP</small>	MU 7051 EN F LPG TRONIQUE	Page 13/18
	This document is available on www.alma-group.com	

4.6 List of alarms

	DISPLAY	MEANING	ACTION
USER	STOP DELIVERY	Intentional interruption of delivery	Continue or end the delivery
	COMMUNICATION FAULT	Communication with the printer lost	Check the connection cable, on-off switch and fuse
	POWER SUPPLY PROBLEM	Power outage during delivery	Check the cause / Restore power supply
	ZERO FLOW DEFAULT	Zero flow	Check if the pulse transmitter is powered (red indicators)
	LOW FLOW DEFAULT	Low flowrate (less than 4m ³ /h)	Check the hydraulic system (valve, strainer, nozzle...)
	HIGH FLOW DEFAULT	High flowrate (greater than maximal flowrate)	Check the parameters / Reduce flowrate
	METERING PROBLEM	Metering problem with the measuring device	Check if the pulse transmitter is powered (red indicators)
	PTO DEFAULT	Coherence failure with power take-off	Check the power take-off status in driver's cab
	HOSE BURST	Flowrate variation caused by a hose burst	The delivery is stopped automatically
	DIARY DEFAULT	Reset of the events diary	Acknowledge the alarm, check the date in supervisor mode (RFID key)
Three tricolour LED on the MICROCOMPT+ front face are showing the wireless connection status as described in the operating manual MU 7051			
REPARATOR	DISPLAY DEFAULT	Problem with display card	If steady alarm, substitution of the display card
	WATCHDOG DEFAULT	Fault with display or power card or AFSEC+ card	Switch on-off the MICROCOPT+ / If steady alarm, substitution of the faulty card
	TOTALISER LOST	Loss of totaliser	Substitution of the backup battery
	TEMPERATURE DEFAULT	Temperature determination failure	Check the temperature probe / If steady alarm, see a reparator for trouble shooting
	MEMORY LOST (PILE)	Loss of saved memory	Substitution of the backup battery
	MEMORY LOST	Error on SIM memorization	Enter and exit the METROLOGICAL mode / If steady alarm, substitution of the backup battery
	DATE AND TIME LOST	Loss of date and time	Set date and time in supervisor mode (RFID key)
	COEFFICIENTS DEFAULT	Deviation between coefficient LF/HF greater than 0.5%	Modification of the low flow coefficient (K1)
	PROM DEFAULT	Loss of software or resident integrity	Substitution of the AFSEC+ electronic card
	RAM DEFAULT	Saved memory fault	Substitution of the AFSEC+ electronic card
EEPROM MEMORY LOST			
MEMORY OVER LOADED			

5 SET THE LPG TRONIQUE: SUPERVISOR MODE

 ALMA <small>ALMA GROUP</small>	MU 7051 EN F LPG TRONIQUE	Page 14/18
	This document is available on www.alma-group.com	

5.1 Menu PRODUCT SETTINGS

This menu is used to set the product label.

5.2 Menu TIME ADJUSTMENT

Date and time are set in METROLOGICAL mode. You can adjust time ($\pm 2h$) one time a day. Use French format, for example: 14.41 means 2.41 pm.

TIME ADJUSTMENT → 14.41 ←
TIME (HH:MM) ←
